20+ Years Creating Standout Content

Producer | Director | Editor | Animator

SUMMARY

With over 20 years of experience, I've helped clients and brands create standout video content aligned with their strategic marketing goals. My background spans editing documentaries, brand films, producing social content, and crafting broadcast commercials, all of which contribute to my extensive production skill set.

My expertise in content development includes producing, directing, animation, editing, mixing and sound design, writing, and coordinating key elements such as voice-over hiring and licensing of creative assets. This blend of technical proficiency and production insight enables me to guide projects seamlessly from concept to final delivery with precision and creativity.

I am deeply immersed in today's content creation tools, mastering Adobe Creative Cloud applications like After Effects, Premiere Pro, and Illustrator, while also leveraging generative AI tools such as Firefly, Midjourney, and DALL-E. My capabilities span from 2D animation to 3D design using Cinema 4D, Blender, and Element 3D, with color finishing expertise in DaVinci Resolve. My passion for sound design and audio mixing rounds out my comprehensive post-production skill set. This deep-rooted technical foundation allows me to deliver polished, high-quality content that exceeds client expectations while fostering a collaborative process that eases workloads and elevates creative visions.
